► Service Counter Screen

Do you need to urgently install protective plastic barrier screens to ensure the safety of your staff and clients?

Then you've arrived at the right place as EGR is Australia's largest manufacturer of rigid polymer sheeting used in protective barrier screens.

High traffic public-facing environments such as medical centres, pharmacies, and supermarkets are installing ZenoShield transparent protective barriers at front desks and checkouts to help keep staff and the public from infecting one another with the coronavirus.

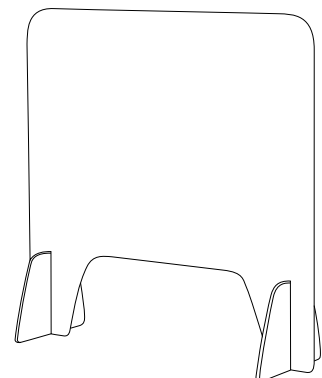

These and other distancing measures are guaranteeing the safety of your staff and customers.

EGR Zenoshield Protective Screen allows you to :

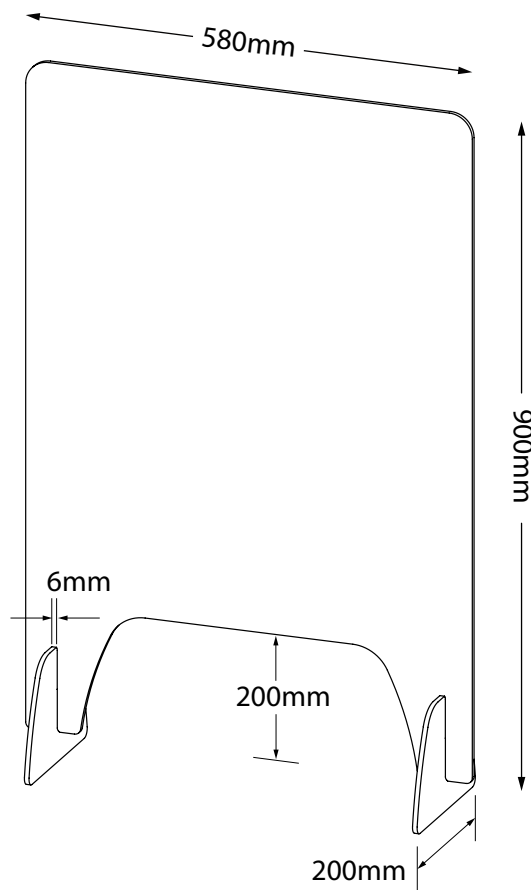

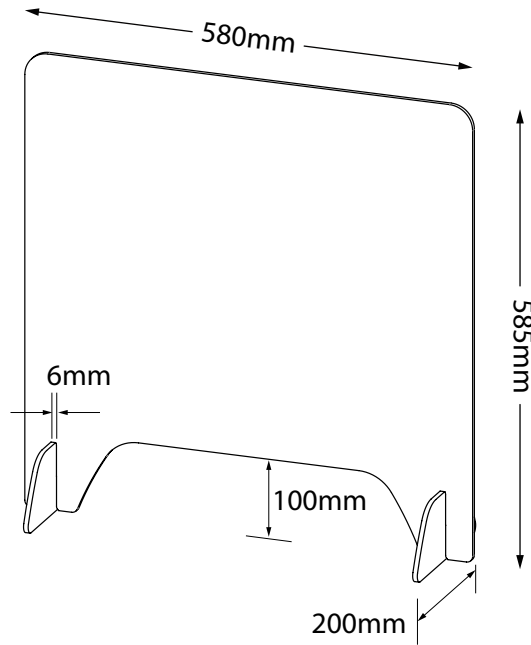

- ▷ take extra precautions for the well-being of your customers and staff
- ▷ bring peace of mind that you are doing everything you can to keep your staff and customers safe
- ▷ provide protection even when the mandatory 1.5-meter social distance is not available

Manufactured from robust, transparent acrylic, EGR ZenoShield Protective Screens will withstand the harshest environments. They are maintained and cleaned easily using commonly available surface cleaning solutions.

These screens are perfect for medical centres, supermarkets, pharmacies, grocery stores - in fact, any public spaces where it is vital to keep the minimum "social 1.5m distance" between the medical staff, customer service personnel, and the general public.

The ZenoShield Range

About EGR

The ZenoShield Protective Barrier System is manufactured by EGR, which is Australia's largest manufacturer of rigid polymer sheeting.

The EGR Group is a global leader and produces the highest quality extruded sheets from a broad range of polymers.

It specializes in co-extrusion technology widely used in Automotive and Building and Commercial product applications. The Group has consistently invested in its highly trained personnel and deploys the very latest manufacturing technology available today.

 EGR, 45 Machinery St, Darra, Brisbane, Queensland 4076
